

2025-2026 Season Report

Veterans fencing in Spain continues to advance and consolidate.

Its importance rests primarily with the Spanish Association of Veterans Fencing, which has historically managed veterans fencing. It has its own competition league, which has included team competitions for several years. These are currently being run in a mixed format until they are fully established.

As already proposed to the Board of Directors, it would be beneficial to consider including the +80 category, not only as a form of recognition but also at the competitive level. This is a matter that requires detailed study because it would affect the competition rules. Doing this correctly will likely lead the FIE to adopt our competition rules, as it has done with the team competition at the World Championships.

Regarding the Association in Spain, its reputation is growing, as is the trust placed in it by its member veteran fencers. Both the quality of service and the commitment are highly valued.

We want to continue working on these issues, always in alignment with EVF.
